'Together for Europe' : Our common YES to the protection of creation

Spijtig genoeg is deze informatie niet in het Nederland beschikbaar.

The challenges for the protection of creation and an **integral ecology** are growing exponentially worldwide. **On 2nd March 2024, the *Together for Europe* network has dedicated an entire day online to this topic.** Professionals and activists from various Churches and Movements, from 9 European countries, spoke at the Seminar entitled: ‘Called to Unity – Towards an Ecology of Relationships’. An enthralling ‘journey’, in which the speakers in an atmosphere of increasing convergence presented their research and commitment to environmental protection, and then entered into dialogue with the many persons present in the ‘virtual hall’. Experiences already in place in many places and encouraging good practices, easily imitated, have highlighted the desire and commitment to respect and preserve creation for future generations. **This unites us as Christians and easily connects us with others.**
