

The Earth Cube™

For Kids

The Earth Cube™ is a fun and motivational way to be more earth friendly! Our everyday actions can have a huge impact on the things that share this beautiful planet with us, such as the animals, plants, water, and even air. It is our job to take care of the earth and there are many small acts we can take to help!

How does The Earth Cube work? Roll the cube, then read the message that faces up and find a way to live it! Do this each day, and share your results with your friends, parents, teachers, and classmates, and encourage them to take action with you! And remember, there are kids just like you doing their part all around the world!

Fold It! Roll It! Experience It!
