

Press Release – August 8, 2014

Unlock dialogue to arrive to peace
A global gesture on August 15, 2014

The youth of the Focolare Movement join people around the world who are mobilizing themselves in an appeal for peace. **“Dialogue to unlock”** affirms the need to practise dialogue as a way to find a solution for conflicts, and it encourages one to start practising this on a personal level while proclaiming the message to rulers and policy makers.

The initiative, which starts on August 15, aims at involving people from all over the world who would like to adhere to this idea, wherever they are, through a page on Facebook (<https://www.facebook.com/dialoguetounlock>) where they can sign their membership by posting messages, clips and photos wearing something white.

This initiative fits in the various peace campaigns that are being held in individual countries during this time. **“Dialogue to unlock”** will continue during the coming months while it collaborates with other initiatives in favour of peace.

The appeal for dialogue may be read on
